## Technical Bulletin - Swabs

The LumiraDx SARS-CoV-2 & RSV Test is an automated rapid microfluidic immunofluorescence assay for use with the LumiraDx Platform for near-patient testing, intended for the simultaneous qualitative detection and differentiation of SARS-CoV-2 nucleocapsid protein antigen and respiratory syncytial virus (RSV) viral antigens in direct nasal swab specimens from individuals suspected of a viral respiratory infection consistent with COVID-19 by a healthcare provider.

This Technical Bulletin will aim to provide a comprehensive list of LumiraDx validated swabs for use with the SARS-CoV-2 & RSV test.

## Technical Bulletin - Swabs

This Technical Bulletin includes a complete list of swabs specific to a supplier and a product code whose performance was confirmed acceptable for use with the LumiraDx SARS-CoV-2 & RSV test at the time of validation testing. LumiraDx cannot guarantee that swab suppliers will not change raw materials or other swab specifications, which could affect performance. Please review the swab supplier's limitations and intended use before sample collection. LumiraDx cannot guarantee the availability of the swabs listed.

Swabs from alternative suppliers have not been validated for use with the LumiraDx SARS-CoV-2 & RSV test. The Test may not perform as expected if using swabs from alternative suppliers.

Furthermore, the above suppliers may offer similar swabs under a different product code. These swabs have not been validated for use with the LumiraDx SARS-CoV-2 & RSV. The Test may not perform as expected if using swabs other than the exact product codes listed above.
